Vision will start shipping a 4K media player in Q4 this year.

The **Vision Media Player (VMP)** is already shipping an i5-powered device which can either drive two displays at 2560 x 1600 each, or three displays at 1920 x 1200 each.

The new 4K devices will be available with i3 and i5 processors and will feature an HDMI output and a DisplayPort output. The HDMI output offers up to 1920 x 1200 and the DisplayPort output offers up to 3840 x 2160.

The DisplayPort signal can also be daisy-chained on from the first DP monitor to a second at the same resolution, with independent content going to each monitor. This is a function of DP 1.2 is called **Multi-Stream Transport**.

Vision’s media players are full-powered open-platform computers which come with Windows or Linux OS pre-loaded. Vision offers SignageLive pre-installed.

Vision’s range includes the **Techconnect**modular cable and faceplate family of products, the **T echmount**
range of bracket solutions, and the
Techaudio
range of Amplifiers and speakers.
