projectiondesign got our vote for the best stand at the new **xSolutions** show in UK.

They demonstrated their projection solutions including the F35 wqxtga high-resolution projector, the FR12 Remote Light Source projector for command and control and the F82 series featuring 3-chip DLP technology.

In addition, projectiondesign previewed the world's highest resolution 3D single-chip DLP projector, the F35 AS3D.

What clinched their "pole position" at XSolutions was their **real-life motion platform Formula 1 simulator** on the stand. Courtesy of

PureTech Racing

, this simulation drew pro AV integrators who stood in line to get their shot at the fast lane.
