

Vivitek and Vioso sign a partnership agreement to promote Vioso's Anyblend edge-blending software technology with Vivitek's large-venue projectors.

With the easy to use Vioso edge-blending technology, multiple-projector set-ups of up to 6 projectors are possible to show seamless, scalable, high resolution projection displays with all Vivitek projectors.

Vioso Anyblend aligns and blends multiple projectors by using an additional camera, a fully automated process achieves this task within minutes. The projectors have to be connected to a PC or laptop with Vioso Anyblend software installed and the application realizes seamless pictures within a matter of minutes.

"At Vioso we were especially impressed with Vivitek's future vision and roadmap. Large-venue projection is a strategic competence for Vivitek and in our thorough joint product tests we were both excited about the quality solutions that we could jointly offer the market. Vivitek therefore chose Vioso's Anyblend," says Benjamin Fritsch, CEO at Vioso GmbH.

"The partnership between Vivitek and Vioso will allow our authorized resellers to access not only first-class hardware, but also software solutions designed for creative use of front
