The new **Christie AP Series of 3LCD projectors** deliver 5000 ANSI lumens in a compact and very affordable package.

Both the **Christie LW502** and **Christie LWU502** deliver the Christie performance standard and **HDBaseT**
(HDBT) single-cable connectivity for both digital signal and control.

With the LW502 delivering 5000:1 and LWU502 offering up to 10,000:1 contrast ratio, Christie AP Series also includes edge blending, warping, DICOM simulation and an optional wireless adapter for connecting wirelessly to a LAN and showing presentations from a remote computer.

Featuring a comprehensive list of I/O connections, the Christie AP Series manages a variety of integration environments and content sources. Ideal for easy installation in classrooms and meeting spaces, each model offers up to 6000 hours lamp-life and integrated audio.

“The Christie AP Series combines the quality Christie is famous for with an exceptional value-add proposition,” says Jim Hall, senior product manager, Christie. “With its rich feature set and low cost of ownership, the Christie AP Series delivers an impressive presentation every time.”

The Christie LW502 and Christie LWU502 ship in the summer of 2016, backed by a 3-year warranty and Christie's customer support.
