"A successful digital media solution accounts for more than what you can see on the surface," says

Convergent. "It's what

we consider the "

The Digital Media Iceberg..."

**Solutions are getting more complex, not less.** Convergent argues all the attention is given "to things like content and bezel-less screens" which leads users into making mistakes with their enterprise networks and the infrastrure that drives effective digital signage, the modern digital signage that encompasses so much more digital media than the "signage" of even 5 years ago.

A Ballantyne Strong Inc. company, for 35 years they've been working with clients to transform the customer experience and enhance the communication across employee channels.

Convergent want to challenge customers to think differently about how to engage with their customers and employees-- and the technology they use to do it.

With the addition of new technology (just take, for example, mobile and Big Data and iBeacons), digital "signage" just doesn't encompass what can be achieved

## The Digital Media Iceberg
