

KioScreen: The Through Glass TouchScreen

Written by Bob Snyder
30. 05. 2013

LifeSize Touch says its **KioScreen** is the only touchscreen product on the market that works through glass using a zero bezel touchscreen panel.

The touch layer is safely housed in a robust panel enclosure, making it easy to move or install without damage (and without needing adhesive touchfilms).

LifeSize Touch will also be providing a complete bundled solution for businesses.

There is the option to buy complementary accessories and a monthly rental of kiosk software, **KioApp** for updating touchscreen content.

KioApp is available for Property, Retail and Hospitality.

KioScreen will initially be available in three variations and prices:

KioScreen: The Through Glass TouchScreen
