Extreme Networks Summit X440 Series: AVnu Certification

Written by Roger Douglas
01. 04. 2014

AVnu Alliance announces the first AVnu-certified AVB series of switches from Extreme Networks: the Extreme Networks **Summit X440 Series** of stackable switches has passed all testing for certification and will now bear the AVnu-certified Logo.

Extreme Networks' AVB Summit X440 Series is a stackable switch that extends the benefits of the ExtremeXOS operating system to intelligent, affordable, edge switching for professional audio/video applications, where data, audio and video co-exist on a single standards-based network.

IT managers and AV integrators benefit from simplified deployments, enhanced quality of service and reduced costs from a converged network.

The Summit X440 Series Switch was demonstrated in the AVnu Alliance Pavilion at ISE 2014.
